

speed-i-jet 798 Handheld Inkjet Printer

REINER
OFFICIAL UK DISTRIBUTOR

fully portable inkjet printer

The speed-i-jet 798 allows a single line of text to be printed directly onto porous surfaces including paper, card, timber and fabrics.

Real time data including date, time and counters can be included in print messages.

The print message is created using PC-based software and sent to the speed-i-jet via USB.

The printer is simply rolled across the product surface and the trigger pressed to start printing.

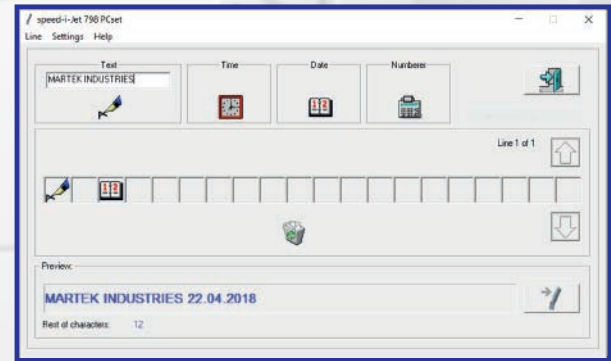

paper - card - timber - fabric ...

simple 2-step operation

1. Using Reiner PC Set EASY software, create a print image which may contain text, date, time and serial number. Transfer the design to the speed-i-jet 798 via USB.

2. Place the printer on the product and roll across the surface. Pull the trigger to start printing
